* Record only when located by playback

TERRITORY EVIDENCE CODES	
F	Flying over
H	Species observed in breeding season in suitable nesting habitat
S	Singing male present
P	Pair observed in suitable nesting habitat in breeding season
D	Courtship and Display (in or near potential breeding habitat)
A	Agitated behaviour or anxiety calls from adults
N	Visiting probable Nest site
B	Nest Building

RESPONSE CODES	
S	Song
C	Calling
A	Agitated behaviour or anxiety calls
N	None

HABITAT CODES	
1 Habitat structure	2 Habitat category
A Low scrub, shrubs and managed hedgerows (1.5m to 3m)	A - Linear features (e.g. hedges, tree lines, thin strips of woodland, railway embankments); B - Semi-natural scrub;
B Tall hedges, bushes, scrub and young trees (3m to 6m)	C - Young plantation (<5m high); D - Plantation woodland (>5 m high); E - Semi natural woodland (>5m high).
C Trees and woodland edge (>6m)	

CHECKING FOR COLOUR RINGS

Territory	Individual 1				Individual 2				Comments	
A	L	___/___	R	___/___	L	___/___	R	___/___		
B	L	___/___	R	___/___	L	___/___	R	___/___		
C	L	___/___	R	___/___	L	___/___	R	___/___		
D	L	___/___	R	___/___	L	___/___	R	___/___		
E	L	___/___	R	___/___	L	___/___	R	___/___		

There are currently 11 Willow Tit colour ringing projects in the country, and the number of rings used on each varies between projects (as described in the Methods). There are one or two rings on each leg. The conventional way to list the colours is: top left / bottom left / top right / bottom right - with left and right referring to the bird's left and right. The colours used and their standard abbreviations are: **light green - LG; red - R; yellow - Y; dark green - G; blue - Bu; black - Bk; orange - O; white - W; BTO - M**. There will be one BTO metal ring on every bird. This can be on either leg and above or below the plastic rings. Please make sure that you do not write just "B" for blue or black. Note that some colours can be difficult to distinguish in poor light so be especially careful to check them. For birds with fully or partially read ring combinations please write the combinations in the particular 'rings' columns. The following codes should be entered in the particular 'rings' columns where appropriate: **NC - legs not seen; UR - legs checked and no rings present; RG - ringed but combination not read.**

SUMMARY OF MARSH TIT OBSERVATIONS

Territory	Visit	Ind (I), Pair (P), or count	Territory evidence codes	Found at playback point?	Playback point number	Located by playback?	reaction time (m:s)*	distance to MT (m)*	Response codes	Habitat codes
